PROFESSIONAL SUMMARY

B.Tech Information Technology student with hands-on experience building full-stack and backend systems, REST APIs, real-time services (WebSockets/WebRTC), and database-driven applications — across two internships and multiple production-style projects. Proficient in Java, JavaScript/Node.js, and SQL. Seeking entry-level Software / Backend / Full-Stack Engineering internship roles.

EDUCATION

B.Tech in Information Technology, KJ Somaiya College of Engineering

2022 – 2026

GPA: 8.75/10 | Coursework: Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks, AI/ML

TECHNICAL SKILLS

- Languages: JavaScript (ES6+), Java, Python, SQL, HTML5, CSS3, MySQL
- Backend & APIs: Node.js, Express.js, REST APIs, WebRTC, WebSockets (Socket.io)
- Frontend: React.js, Vue.js (Composition API), Next.js 14, Tailwind CSS
- Tools & Cloud: Git, GitHub, Docker, Vercel, Postman, Clerk Auth, Arcjet, Inngest
- Core Concepts: Data Structures & Algorithms, OOP, System Design, REST API Design, Real-Time Systems, Computer Networks, DBMS, MongoDB, Prisma ORM

WORK EXPERIENCE

Full-Stack Developer Intern | Mehery Soccom Pvt. Ltd.

Jan 2026 – Jun 2026

- Architected a P2P video-calling platform (Vue.js + Node.js) integrating WebRTC with a custom signaling/ICE negotiation service, supporting reliable real-time media streams with sub-second connection setup.
- Designed and implemented the WebRTC signaling layer and ICE negotiation service from scratch, enabling seamless call setup and teardown with automatic peer reconnection on network changes..

Software Engineer Intern | CommonWealth

Jan 2025 – May 2025

- Contributed to the Government Performance Management System (GPMS), a public-sector platform, as part of a 6-engineer Agile/Scrum team across multiple sprint cycles.
- Built and shipped 15+ reusable React components with shared design tokens, reducing per-feature UI development time and eliminating cross-module style inconsistencies.

PROJECTS

Data Warehouse and Analytics Project (GitHub)

2026

MySQL 8.0, SQL, Stored Procedures, ETL, Star Schema, Medallion Architecture

- Designed and built an end-to-end data warehouse in MySQL 8.0 using Medallion Architecture (Bronze, Silver, Gold layers), consolidating ERP and CRM sales data into a unified star-schema analytical model.
- Developed ETL pipelines with MySQL stored procedures to ingest, cleanse, deduplicate, and validate raw CSV data (Bronze → Silver), then built Gold-layer dimension/fact views (Customer, Product, Sales) with SQL analytics and data quality checks (duplicate keys, nulls, referential integrity).

Autonomous Self-Correcting AI Portfolio Agent (GitHub)

2026

LangGraph, LangChain, Groq, FAISS, Streamlit

- Engineered a cyclical state machine in LangGraph featuring dynamic query classification, FAISS vector search, and Self-RAG document relevance grading to eliminate hallucinations.
- Integrated live web fallback via DuckDuckGo and built a 3-tier LLM fallback cascade (Groq → OpenAI → Google Gemini) to guarantee 99.9% uptime during rate limits.
- Deployed an interactive Streamlit UI with real-time state execution tracing, exposing intermediate agent reasoning steps.

Saveior – AI-Powered Finance Tracker (Live App | GitHub)

2025

Next.js 14, Prisma, PostgreSQL, Supabase, Google Gemini API, Arcjet, Inngest, Clerk Auth, Vercel

- Built a finance tracking app that auto-extracts receipt data via the Google Gemini Vision API, eliminating manual transaction data entry, with Arcjet for bot detection/rate-limiting and Inngest-driven scheduling for automated monthly email reports via Resend.

SoMo – Full-Stack Social Media Platform (Live App | GitHub)

2025

React, Node.js, Express, MongoDB, Socket.io, JWT, Cloudinary, Vercel

- Designed and built a MERN social platform end-to-end with features like (posts, comments, follows, bookmarks); implemented real-time likes/comments via Socket.io.

CERTIFICATIONS & ACHIEVEMENTS

Java Programming: Solving Problems with Software (Duke Univ., Coursera) | Version Control (Meta, Coursera) | Visualization for Data Analysis with Power BI (Microsoft, Coursera) | Google UX Design Certificate (Google, Coursera)
